of Russia, who was in the procession. Just a year ago Wednesday a bomb was thrown at King Alfonso in Paris as, in company with President Loubet, he was driving from the opera house.

The wedding ceremony in the historic Cherch of San Jeronimo el Real was a magnificent spectacle.

The aggregate value of the wedding gifts is over \$1,200,000, the crowns and other jewels given the bride by the King being worth \$500,000.

Under the marriage contract the new Queen receives \$90,000 a year.

Madrid (By Cable).-Alfonso and his bride had come from the altar and were receiving an ovation from their myriad of subjects such as even this proud capital had never seen before, when suddenly they were brought face to face with the peril of assassination in its deadliest form. Roses thrown from every side were falling in a soft cascade

upon the royal chariot.

The young Queen, in unfeigned delight, was bowing right and left in ac-knowledgment of the deafening unending chorous of welcome and congratulations, and the King, ignoring the multitude, was feasting his eyes upon the face of his bride, when a bouquet of roses, flung from a balcony, fell with a rush, as though made of lead, in front of the royal coach and just behind the horses drawing it. There was a terrible crash and a little smoke rose in the air. The flowers concealed a bomb. Death and destruction in an instant supplanted the mirth and rejoicing. A score of men' and 'women, including officers and members of the nobility, lay dead or mu-tilated. Had not an electric wire deflected the bomb the king and Queen would have been killed.

The following are the dead: Captain Barros, commanding part of the King's escort.

There was a moment of paralysis and horror following the explosion. All eyes turned instinctively toward the bridal couple and saw their pale faces gazing pitifully at the terrifying scepe around them. The first mangto regain his self-possession was the Duke of Cornachuelos. He rushed forward opened the door of the royal coach and fairly dragged the King and Queen to the ground. Others of the royal escortinstantly surrounded them, and they were led to another carriage. The young King speedily mastered his emotion and gave all his attention to his terrified

and trembling bride. The broken line of march was hurriedly taken up to the palace. Neither the King nor Queen was hurt. The bride made a brave effort to control her feelings, but the fearful transition from joy to horror was too much for human nerves to endure, and presently she burst into tears. If the truth must be told, the King himself wept in sympathy. Meantime at the scene of the outrage the first paralysis was succeeded by great confuson. The crowd, when it realized what had happened, became infuriated and surged towards the spot, intent upon wreaking vengeance upon the supposed

author of the crime. The news of the attempted assassination spread throughout the city with great rapidity, turning the rejoicing of the populace to awe. The telegraph offi-ces were invaded by struggling masses. but a rigid censorship was instituted.

The explosion would probably not have occurred if the cortege had followed the route originally planned; but returning it was determined to retrace part of Mayor street and give the people a

The packers are charged with absolute isregard of the elementary rules of sanation and cleanliness and even decency, Very plain language is used in describng conditions that are sickening.

Absence of cleanliness, says the report, was found everywhere in the handling of meat under preparation for various food products. The workers climb over heaps of meat and frequently throw them upon the dirty floor. In many of the rooms the floors are soaked and slimy. "In a word," say Messrs. Reynolds and

Neill, "we saw meat shoveled from filthy wooden floors, piled on tables, rarely washed, pushed from room to room in address to the people stigmatizing the rotten box carts, in all of which processes it was in the way of gathering dirt, splinters and filth. "A very considerable portion of the meat so handled is sent out as smoked products and in the form of sausages, which are prepared to be eaten without being cooked. A particularly glaring instance of uncleanliness was found in a room where the best grades of sausages are being prepared.

The report says that the meat that is used in the various forms of canned prolucts and other prepared foods goes brough many processes, in all of which here is a possibility of contamination hrough unsanitary surroundings. Alhough there is no Government inspection of these products, when they are sent out hey bear a label stating that they have een passed upon by Government inspec-

Men and women, it is stated, plunge their unwashed hands into the meat to be converted into food products. Tuberculosis victims expectorate on the spongy wooden floors, from which falling scraps of meat are later shoveled up to be converted into food products.

"The ordinary decencies of life," says the report, "are completely ignored. The whole situation tends inesitably to the moral degredation of thousands of workrs, who are forced to spend their working hours under conditions which are a menace not only to their own health, but Ardos of Manuel Morales, the chief to the health of those who use the food products prepared by them.'
